

*Installation Instructions for the Se-Kure*

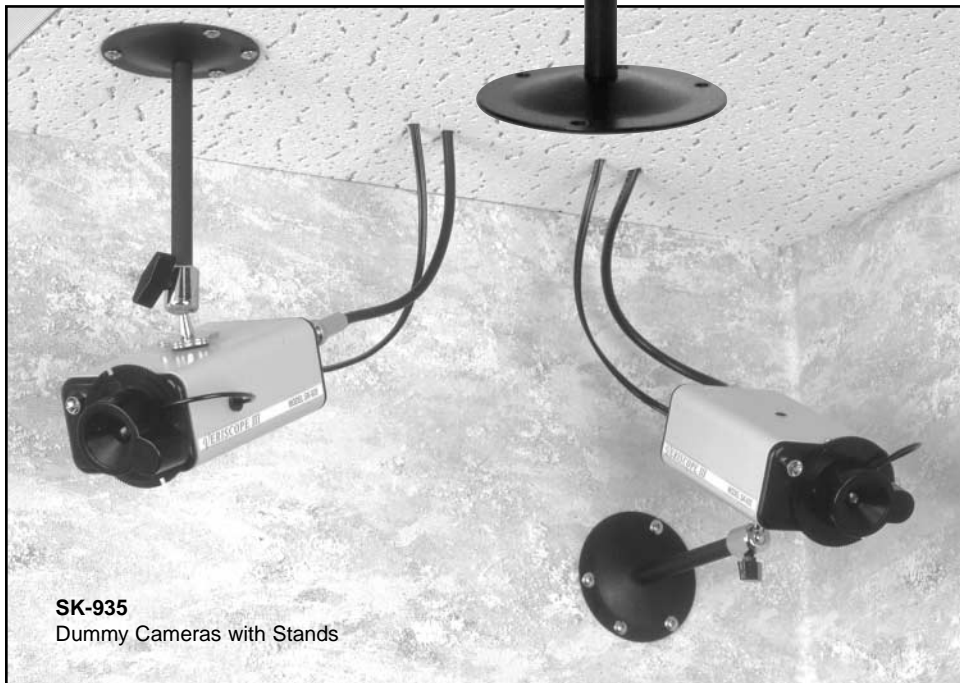

# **Dummy Camera**

*Model No. SK-935*

Simulated or "dummy" cameras are recommended only as a visual deterrent. They should never be used to protect people unless they are used as a decoy in conjunction with live cameras. Se-Kure Controls® Inc. accepts no liability from loss or damage or personal injury caused by the use or misuse of this simulated camera.

Remove these  
phillips head screws  
to install the "C"  
size battery.

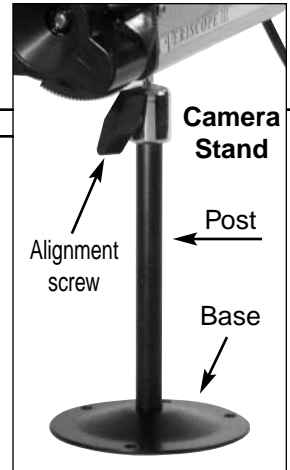

**SK-935**

Dummy Cameras with Stands

# Simple Assembly Instructions:

## Stand:

1. Bolt the base to post.
2. Mount the stand to the location you want the camera to appear... with the provided hardware. The stand maybe mounted to wall, ceiling, etc...

## Battery:

1. Remove the (2) phillips head screws located on either side of the lens housing, and pull the front piece off.
2. Install a fresh "C" size alkaline battery onto the battery holder, (make sure + aligns with +, and - aligns with - ).
3. Replace the lens housing along with the (2) phillips head screws.

## Camera:

1. Screw the camera onto the stand (clockwise) and screw the mounting plate toward the camera (counter clockwise).
2. Align camera to the correct position, and tighten the alignment screw.
3. Make (2) holes in the wall or ceiling for the power and coaxial cables.
